

KEY

Existing trees

Existing embankment/screen planting along southern boundary (evergreen and deciduous trees/shrubs)

Existing marshy grassland to be retained

Existing 1m contours

Proposed native trees. Typical species:
Acer campestre, Sorbus aucuparia, Sorbus aria, Prunus avium, Quercus robur, Pinus sylvestris, Quercus ilex, Betula pendula

Existing scrub vegetation along northern boundary to be retained and managed as a green corridor to enhance biodiversity

Proposed native screen planting (trees/shrubs). Typical species:
Acer Campestre, Betula pendula, Cornus sanguinea, Corylus avellana, Crataegus monogyna, Ilex aquifolium, Ligustrum vulgare, Prunus spinosa, Quercus ilex, Quercus robur, Viburnum

Proposed native hedge/shrub planting. Typical species: Acer Campestre, Carpinus betulus, Cornus sanguinea, Corylus avellana, Ilex aquifolium, Ligustrum vulgare, Viburnum opulus

Proposed amenity grass (pitches and central area of Site)

Proposed other neutral grassland (wildflower grassland) around Site perimeter to reinforce green corridors and enhance biodiversity

Proposed camping pitches (touring caravans, motorhomes, tents)

- 1

Existing cherry laurel hedge to be removed and replaced with native screen planting
- 2

3no. trees to be removed as part of off-site road works. Trees to be replaced as part of the approved proposals on land to the west (refer to point 6).
- 3

Proposed Play Area for young children
- 4

Proposed Amenity Building
- 5

Proposed protected ecological area (with gated access for maintenance)
- 6

Approved proposals on land to the west which includes buildings, parking, and screen planting (mixed native hedge along A27, trees and shrubs)
