

Ecology response for H/23/94722 49 PORTELET PLACE, HEDGE END, SOUTHAMPTON, SO30 0LZ

Loft conversion with front and rear dormers, log burner flue and single storey rear extension

Dorothy Hei-Tung-Hoh

4/4/23

There are records of bats and hedgehogs very close to this property. I have reviewed the site photos and note that there are hanging tiles on the gable ends which can be very attractive to roosting bats. I don't see any obvious slipped tiles or gaps where bats could roost from these photos.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be called. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

Biodiversity enhancements will be required. A bat box and a swift nest box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
