

Ecology response for H/23/94707 74 HURSLEY ROAD, CHANDLER'S FORD, EASTLEIGH, SO53 1JB

Demolition of garage, extension of porch at front, first floor rear extension, ground floor rear and side extension and patio at the rear

Alex Stone

4/4/23

There are records of bats very close to this property and the proposals involve extensive works to the roof. There are also records of hedgehogs and swifts nearby.

Please could you send close up photos of the roof, fascia, flashings, soffits and any areas of the house and gardens that will be affected by the proposals.

Biodiversity enhancements will be required. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
