

Ecology response for H/23/94819 60 HUNT AVENUE, NETLEY ABBEY, SOUTHAMPTON, SO31 5BE

Two storey side extensions. Single storey rear extension

Claire Campbell-Best

6/4/23

There are records of bats very near this site and the proposal involves extensive work to the roof. To determine whether any surveys will be necessary I need to review close-up photos of all elevations of the roof, soffits, fascia, flashing, and any areas of the garden and outbuildings that would be affected by the proposals.

Biodiversity enhancements are required. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight. (<https://www.swiftconservation.org/Nestboxes%26Attraction.htm> )
