

Ecology response for H/23/94855 56 GUILDFORD DRIVE, CHANDLER'S FORD, EASTLEIGH,
SO53 3PT

Front two storey extensions. Entrance porch. Alterations to fenestration.

Alex Stone

20/4/23

There are records of bats, breeding swifts and hedgehogs near this property. I have reviewed the photo of the front of the house on Google Maps and I don't see any potential bat roost features which would be affected by the proposals.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be called. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

Biodiversity enhancements will be required. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
