

Eastleigh Borough Council Tree Preservation Order and Conservation Area Assessment Form

Application Number	T/23/94935					
Surveyor	JM					
Address	47 ASCOT ROAD, HORTON HEATH, EASTLEIGH, SO50 7JP					
Proposed work	1 no. Oak (T1) - Crown raise to highway specification of 5.4m from the ground and reduce over extended branches by up to 2m over the highways to prevent branches failing in adverse weather conditions. 1 no. Oak (T2) - Crown Raise to highway specification of 5.4m from the ground and reduce over extended branches by up to 2m over the highways to prevent branches failing in adverse weather conditions.					
Assessment Date	24/04/2023					
Officer comments	The 2 oak trees are highly visible from the public realm. Both trees have a typical spreading form found in this species and no over-extending branches were identified; all the lower limbs create a linear crown edge with the rest of the tree, with no growth extending further than this natural drip line. Neither have limbs longer than 40 x the diameter of the attachment points, so pruning for extended branching would be unnecessary in both cases.					
Decision	Consent	Refuse	Part consent/ Part refuse	Withdrawn / Invalid	Conservation Area	
			x		Raise no objection	TPO
Decision notice	Refuse: 1 no. Oak (T1) - Reduce over extended branches by up to 2m over the highways to prevent branches failing in adverse weather conditions. 1 no. Oak (T2) - Reduce over extended branches by up to 2m over the highways to prevent branches failing in adverse weather conditions. Consent: 1 no. Oak (T1) - Crown raise to highway specification of 5.4m from the ground over the highway. 1 no. Oak (T2) - Crown Raise to highway specification of 5.4m from the ground over the highway.					
Conditions	Standard					
Notes to applicant	None
