**EUROPE'S LEADING HIGH PERFORMANCE ENERGY SAVING WINDOW & DOOR MANUFACTURER**

To Whom It May Concern,

After reviewing some of the acoustic report which was e-mailed to Munster Joinery regarding Allington Lane we would suggest the following:

For the livingroom adjacent to Allington Lane we would suggest a 4-14-6.8mm laminated glazing unit and our acoustic vents. This would get a 31dB Rw + Ctr.

For the bedroom adjacent to Allington Lane we would suggest a 6-24-6.8 mm laminated glazing unit and our acoustic vents. This would get a 34dB Rw + Ctr.
