

Ecology response for H/23/95095 KISMET, ALLINGTON LANE, WEST END, SOUTHAMPTON, SO30 3HQ

Single storey rear extension, first floor rear/side extension with addition of dormer on the side and roof light to front elevation

Alex Webb

9/6/23

There are records of bats, badgers, amphibians and reptiles in the near vicinity of this property. It is adjacent to the Itchen Valley Country Park SINC and approximately 700 m from the boundary of the River Itchen SAC and SSSI.

Due to the extensive work to the roof and the numerous records of bats nearby a preliminary bat roost assessment survey will be required. This must include an internal inspection. ACEMP and biodiversity enhancements will be required.

Biodiversity enhancements will be required. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > our-work > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight. (<https://www.swiftconservation.org/Nestboxes%26Attraction.htm>)
