Siting of shipping containers for use as offices and storage in association with marina related
business and decking (Retrospective Application)

Rachael Morris

25/7/23

The design and access statement states that this application is the retrospective addition of white aluminium cladding. It is not clear where the shipping containers are located with respect to any ecological receptors as the site plan only shows a portion of the site. I need to review site photos to check whether any potential ecological disturbance or surface water drainage issues might arise from this proposal. Biodiversity enhancements are also required.
