

Ecology response for H/23/95537 10 MERDON AVENUE, CHANDLER'S FORD, EASTLEIGH, SO53 1EJ

First floor extension over the existing garage space. Addition of gable end to roof facing road. New porch. Conversion of the existing garage to habitable space (Resubmission H/22/94350)

Alex Stone

31/7/23

There are records of bats, hedgehogs, and breeding swifts near this site. I need to review close-up photos of the roof, soffits, fascia, flashings and any hanging tiles such as those on existing dormer windows.

Biodiversity enhancements will be required. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight. (<https://www.swiftconservation.org/Nestboxes%26Attraction.htm> )
