

Ecology Response for F/23/95592 54 LEIGH ROAD, EASTLEIGH, SO50 9DT

Creation of [3.no](#) flats, including two storey and single storey extensions, and parking, cycle and refuse storage.

Summer Sharpe

7/8/23

There are records of bats, nesting swifts and hedgehogs near this site. The proposal will affect the roof, involve demolishing at least one outbuilding and result in paving of most of the existing garden areas which appear on the aerial photos. To determine whether a survey will be required I need to review some close up photos of the roof, windows, fascia, flashings, areas around the windows, outbuildings and any garden areas around the house.

Biodiversity enhancements will be required. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
