

Ecology response for H/23/95752 RAILWAY COTTAGE, ALLINGTON LANE, WEST END,
SOUTHAMPTON, SO50 7DE

2 storey side and single storey rear extension

Rachael Morris

4/9/23

There are records of bats, stag beetles, and hedgehogs in the area. This site is in a green impact zone for great crested newts and there are records of great crested newts 400 m to the north and 600 m to the northwest. To determine whether a survey is required I need to review close up photos of all aspects of the roof, soffits, fascia, flashings, windows and the garden areas that would be affected by the proposal.

Biodiversity enhancements will be required. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
