

Ecology response for H/23/95762 28 SEDGWICK ROAD, BISHOPSTOKE, EASTLEIGH, SO50 6FH

First floor side and single storey front extensions to form new porch, loft conversion with rear dormer and replacement single storey garage. (Resubmission of application H/17/82138).

Claire Campbell-Best

7/9/23

There are numerous records of bats in the immediate area and these proposals involve extensive works to the roof and loft. There are also records of hedgehogs and stag beetles. To determine whether a survey is required I need to review close-up photos of the roof, soffits, fascia, areas around the windows and flashings. Photos of the garage and garden are also required.

Biodiversity enhancements will be required. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > our-work > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
