

TPO 578-E Lime

T1 visible from Allbrook Hill.

Discussion.

T1 is an early mature lime in the rear garden of the property. It is visible from the main road and neighbouring gardens.

It is low over the owner's garden and the gardens either side. It can be lifted without loss of amenity or long-term detriment to the tree.

A crown lift of 4.5m is recommended, limiting the cut size to 75mm in diameter, and it is anticipated this will result in the removal of 5 branches up to this size. Three of the branches are starting to collar.

The cuts will be at the main stem union so it is anticipated that this will be a permanent solution, or at least last for some years. This will allow improved access and use of the rear gardens and will abate the nuisance to the neighbours as it is in contact with the boundary fence.

4 poles (ex-leylandii hedge) will be removed at the same time – these are dead.

Photos on next page.

T1 lime, low over garden and fence. 4 x poles to remove (exempt)
