

Ecology response for H/23/96031 97 KINGSWAY, CHANDLER'S FORD, EASTLEIGH, SO53 1FD

Raising of roof to create second floor accommodation, first floor side extension and single storey rear extension to replace existing rear extension.

Alex Stone

5/10/23

I have reviewed the site photos and can see that there are hanging tiles on the dormers, which could be attractive to roosting bats. There are multiple records of bats in the immediate vicinity of this house. There are also records of hedgehogs and stag beetles.

A preliminary ecological appraisal will be required. The report must assess the potential for bats to be affected by this proposal, provide a precautionary working method for hedgehogs and stag beetles, and provide recommendations for biodiversity enhancements appropriate for this property.

A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
