

Ecology response for H/23/95962 THE BUNGALOW, KNOWLE HILL, EASTLEIGH, SO50 4LZ

Alterations and extension to garage roof to include enlarged east facing dormer to facilitate change of use to annexe (amendment to planning permission H/22/93629) (Part Retrospective)

Clare Campbell-Best

9/10/23

In reviewing photos for the previous application H/22/93629 there were no potential bat roost features visible.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be informed. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

Biodiversity enhancements are required. A bat box or a swift nest box may be appropriate for this site. Enlarging this building would allow both a bat box and a swift nest box to be built into the building, either in the dormer or gable ends. Built in boxes are preferred as they do not need maintenance and cannot fall off.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
