

Ecology response for H/23/96080 37 OSBORNE CLOSE, ROYAL VICTORIA COUNTRY PARK,
NETLEY ABBEY, SOUTHAMPTON, SO31 5GX

Construction of two storey rear extension, front porch and removal of chimney stack.

Alex Stone

16/10/23

There are many records of bats very close to this site. It is in a green impact risk zone for great crested newts, and there are records of slow worms, common lizards, breeding swifts and stag beetles nearby. There is also potential for hedgehogs and badgers with records in the area. It is located within a wooded area which is connected to nearby woodlands.

A preliminary ecological appraisal is required. This can be done at any time of year.

Biodiversity enhancements will be required. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > our-work > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
