

Ecology response for H/23/96109 30 HORTON WAY, BISHOPSTOKE, EASTLEIGH, SO50 8LU

Demolition of existing conservatory to create single storey front, rear and side extension and alterations to the fenestration.

Alex Stone

16/10/23

There are records of bats very close to this site but I have reviewed the photos of the building on Google Maps and I don't see any potential bat roost features. The property is adjacent to West Horton Farm Woods SINC on its southern boundary but this proposal does not extend any closer to the edge of the property and would not be expected to impact the SINC.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be called. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

Biodiversity enhancements will be required. A bat brick and a bird box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)
