Dear Charlie Vallis

Thank you for your enquiry dated Tuesday, 17 October 2023

Thank you for using the linesearchbeforeudig.co.uk system for your 'Planning Application/Property Conveyance' enquiry for SGN asset maps for your site location.

Please note this response and any attached map(s) are only valid for 28 days.

There are high pressure pipelines in the vicinity of your proposed work area. SGN formally object to this planning application until such time as a detail consultation has taken place.

For your safety, it is essential that no work or crossing of this high pressure pipeline is carried out until a detailed consultation has taken place.

This response is for initial/scoping out work only. This response does not give permission to undertake any work. When consultation has taken place, your planning has been approved and works on site are due to start, another request for information and updated maps must be made via our on-line system as a 'planned works' enquiry.

Please find an extract from our mains records for your search area, any SGN assets are described in the map legend. On some occasions maps may be sent that do not contain any gas pipes, this is due to the location of your proposed work area and although there are no pipelines in the immediate vicinity, consultation is still required to ensure that your development has no other impact on our pipelines. SGN Personnel must confirm the actual location of all pipelines prior to commencement of any work. Please note there may also be additional gas pipes (low pressure, medium pressure, etc.) shown on the mains record.

This mains record only shows the pipes owned by SGN in our role as a Licensed Gas Transporter (GT). Please note that privately owned gas pipes or pipes owned by other GTs may be present in this area and information regarding those pipes needs to be requested from the owners. If we know of any other pipes in the area we will note them on the plans as a shaded area and/or a series of x's.

The information shown on this plan is given without obligation or warranty and the accuracy cannot be guaranteed. Service pipes, valves, siphons, stub connections etc. are not shown but their presence should be anticipated. Your attention is drawn to the information and disclaimer on these plans.

It must be stressed that both direct and consequential damage to gas plant can be dangerous for your employees and the general public and repairs to any such damage will incur a charge to you or the organisation carrying out work on your behalf.

To contact the Pipelines department directly to discuss a consultation for your proposed works, please email Maintenance.Land.Owner.Enquiries@sgn.co.uk in our southern area or PlantProtectionAndPipelinesNorth@sgn.co.uk in Scotland, quoting the LSBUD reference number.

If you require any further information please do not hesitate to contact us.

Yours sincerely,

The Safety Admin Team
