

Ecology response for F/23/96260 253 WINCHESTER ROAD, CHANDLER'S FORD, EASTLEIGH, SO53 2DX

Construction of 2no. semi detached two and a half storey dwellings with associated garage and bin store following demolition of existing dwelling

Clare Martin

31/10/23

There are records of bats, stag beetles, hedgehogs and breeding swifts near this site. It is within an amber impact risk zone for great crested newts. The house is not visible on Google maps street view due to a large hedge at the southern, western and part of the eastern boundaries of the site.

A preliminary ecological appraisal is required for the property. This will include an internal inspection of the loft and recommendations for biodiversity enhancements.

A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
