Subject: RE: F/22/93194 - Ageas Bowl

Hi Liz,

Regarding the amended arboricultural reports (Rev K), we have the following comments:

We welcome the reduction in tree loss around the hotel car park and the quantification of tree loss across the site (although we politely request quantification of tree loss to be broken down into categories and tree stem sizes, as per the Trees and Development SPD).

However, we retain our arboricultural objection and concerns around levels, especially within character area 5. There are significant trees on the boundary and no new information has been provided to demonstrate that the proposal are feasible without the resultant loss of additional trees, some of which are of high significance. Further, we will require evidence that the use of technologies, such as cellular confinement, can work on this site specifically (currently the arboricultural method statement is too generic).

Kind regards,

Chris.
