1 INTRODUCTION

INTRODUCTION

- 1.1 This statement has been prepared by Wessex Planning Ltd on behalf of Mr Patrick Reilly in support of a planning application for the demolition of the existing dwelling and replacement with a new dwelling at Cherry Court, Salterns Lane, Bursledon, SO31 8DH.
- 1.2 The submission includes the following:
- Ecology Report
 - Arboricultural Report
 - Heritage Statement
 - Location Plan
 - Site Plan
 - Proposed Floor Plans
 - Proposed Elevations
 - Massing/Volume Plans
 - Height Comparisons
 - Sections

2 SITE CONTEXT AND HISTORY

SITE CONTEXT AND HISTORY

- 2.1 Cherry Court is a 4 bedroom dwelling located outside of the Urban Edge and therefore in the countryside as designated by the adopted Local Plan. Additionally, the site is located within the Old Bursledon Conservation Area and also within the Old Bursledon Special Policy Area.
- 2.2 The dwelling sits to the northern side of a spacious, triangular plot that slopes downwards from north to south. The site is bounded on all sides by mature trees and hedgerows and to the south of the site lies the railway line and to the west, a public footpath.

SITE CONTEXT AND HISTORY

- 2.3 Contextually the dwellings in the area are of mixed architectural character from traditional to more contemporary. The images below show a selection of dwellings off Salterns Lane. The mix is apparent in this image.

SITE CONTEXT AND HISTORY

- 2.4 The site lies within flood zone 1 and therefore has a low probability of flooding from rivers or the sea.

- 2.5 In terms of planning history, there is no relevant planning history relating to this site.

3 PROPOSAL

PROPOSAL

3.1 The proposals are for the demolition of the existing 4 bedroom dwelling and replacement with a new four bedroom dwelling to incorporate a cinema room and entertainment area on the lower ground floor, a kitchen/diner, boot room, utility room, plant room, study, family room, WC and integral double garage on the ground floor, and on the first floor, four ensuite bedrooms, each with a separate balcony area.

Use

3.2 The use will remain residential.

Amount and Layout

3.3 The existing dwelling has a floor area of 272.5 sqm and an existing volume of 1,326 cubic metres. The replacement dwelling will have a floor area of 455.3 sqm and a volume of 1,660 cubic metres.

3.4 In terms of footprint, the new dwelling will be slighter wider but less deep (circa 26m x 10.8m) than the existing dwelling (circa 20.7m x 16.5m).

Existing Layout

Proposed Layout

- 3.5 In terms of volume, the existing dwelling has a building volume of 1,326 cubic metres, and the proposed dwelling, a building volume of 1,660 cubic metres, representing an increase in 25.19%.

Existing Floor Area = 272.5 m²
Existing Building Volume = 1326 m³
125% of Existing = 1657.5 m³

Proposed Floor Area = 455.3 m² / 4900ft²
Proposed Building Volume = 1660m³

Scale

- 3.6 In terms of scale, the proposed dwelling will be a two storey dwelling with a lower ground floor and comprise of a contemporary, flat roof dwelling, of similar overall height to the existing dwelling.

Existing Elevations

Proposed Elevations

Design and Appearance

- 3.7 The design has been carefully considered and is explained in detail in the planning assessment section below. The influences of the modernistic design for the existing house have been brought through time to influence the new dwelling, whilst also bringing the construction up to modern day, more sustainable, standards
- 3.8 The appearance will bring the elevations up to a modern, contemporary standard with rendered and slate-clad walls around large areas of glazing.

Amenity

- 3.9 Although slightly wider than the existing dwelling, there remains a 6m gap to the eastern boundary and a 4m gap to the western boundary, and approximately 10m from each of the neighbouring dwellings. As such the amenity of the immediate neighbours is not impacted by these proposals.

Access and Parking

- 3.10 Access to the site will remain unchanged, with ample onsite parking together with an integral double garage enabling the entry and egress of cars in forward gear.

Landscape and Trees

- 3.11 The new dwelling will be positioned in the same location as the existing dwelling and as a result, no trees will be impacted by these proposals.
- 3.12 In landscape terms, no changes to the existing landscaping are proposed.

Ecology

- 3.13 An Ecological Appraisal and Bat Roost Assessment accompanies this application which concludes that there will be no loss of habitats, with the existing dwelling having negligible bat roosting potential and no nesting birds.

4 POLICY CONTEXT

- 4.1 The policy context comprises the Eastleigh Borough Adopted Local Plan 2016-2036 (adopted in April 2022), together with the National Planning Framework and its associated guidance.

- Policy DM26, Residential extensions and replacement dwellings in the countryside
- Policy BU7, Residential extensions and replacement dwellings, Old Bursledon Special Policy Area

- 4.2 The most relevant policies of the adopted Local Plan are detailed below, with the full policy text provided as Appendix 1:

- Strategic policy S1, Delivering sustainable development
- Strategic Policy S5, New development in the countryside
- Strategic policy S8, Historic Environment
- Policy DM1, General criteria for new development
- Policy DM2, Environmentally sustainable development
- Policy DM11, Nature conservation
- Policy DM14, Parking

5 OTHER MATERIAL CONSIDERATIONS

5.1 The following Supplementary Planning Documents are material in determining these proposals:

- Residential Parking Standards – January 2009
- Quality Places – November 2011
- Character Area Appraisal – Bursledon, Hamble-le-Rice and Hound – January 2008
- Old Bursledon Conservation Area Appraisal and Management Proposals 2012

6 PLANNING ASSESSMENT

Principle of development

- 6.1 Policy DM26 allows for extensions to, and replacement of, existing dwellings within the countryside that are not subject to an agricultural occupancy condition and are not likely to result in the subdivision of the plot. The extensions, or replacement dwelling, should not result in the dwelling becoming disproportionate in size to its plot, or neighbouring dwellings.
- 6.2 Policy BU7 allows for extensions to, and replacement of, dwellings within the Old Bursledon Special Policy Area provided that the extended volume is no greater than 25% of the original dwelling, have regard to space between buildings, the openness of the area, conserve and enhance the character of the undeveloped landscape, does not result in a disproportionately larger dwelling, is subservient to the existing dwelling, does not contribute to the cumulative urbanisation of the area and is not otherwise detrimental to the character of the area when viewed from the River Hamble.
- 6.3 The proposed increase in volume of the replacement dwelling is marginally above the 25% threshold with an increase in volume of 25.19%. The proposed dwelling respects the spacing between the immediate neighbours and the openness of the area and delivers a high quality dwelling.
- 6.4 As such, it is considered that the volume increase is not materially discordant with the Local plan and taken as a whole, the proposals accord with Policy DM26 and Policy BU7.

Character and Design

- 6.5 The existing dwelling is a substantial building set behind a high screen wall and gates and is positioned almost centrally on the plot. This screen wall and gates together with the existing planting effectively obscure most views of the building from the public realm. The site

falls significantly from the entrance gates to the rear boundary which is defined by a railway line set within a deep cutting.

- 6.6 The existing building was constructed circa late 1950's/early 1960's and has a 'modern' appearance with a low pitched roof. The rear elevation is of more utilitarian appearance with touches of Art Deco architecture. The overall impression of the building is that of an amalgam of styles which has produced an unremarkable result that has no particular merit.
- 6.7 The building itself was constructed in cavity work with cream render finish with elements of ornamental stonework, but has no cavity insulation. With the fenestration being single glazed windows in steel frames, the building is difficult to heat sufficiently and subject to significant mould and damp.
- 6.8 The design of the proposed dwelling has been influenced by the 'modern' appearance of the existing building. However, the opportunity has been taken to produce a more resolved contemporary design approach. This is considered to be a positive contribution to the area. The replacement dwelling would be both energy efficient and respond to modern-day domestic requirements and building standards.
- 6.9 When considering the external appearance, the design was inspired by references to the works of Mies van de Rohe and his minimalist, but high quality Barcelona pavilion, but also by the work of Frank Lloyd Wright, Gropius, the Bauhaus Movement and the later works of Richard Meier (see images on the next page).
- 6.10 The southern elevations has elements which incorporate characteristics of Cubism and the De Stijl movements such as that exhibited in the work of Rietveld in Utrecht. These architectural movements also reflect the artistic works by Mondrian and others. This elevation has elements which project and recede thereby

producing a dynamic façade giving visual movement whilst also providing shade which alters in intensity through the daylight hours.

Mies van de Rohe

Frank Lloyd Wright

Gropius

Richard Meier

The Bauhaus Movement influenced design

Rietveld

Mondrian

6.11

6.12

6.13 The influences are clear in the contemporary design of the new dwelling but follows through the contemporary nature of the original design at the time of its construction.

6.14 There are dwellings of differing architectural styles within both Salterns Lane and in the wider area, and it is not considered that the proposal is out of keeping with this mixed character.

Impact on Residential Amenity

6.15 The replacement dwelling maintains a distance of approximately 10m from the westerly and easterly neighbour dwellings, with boundary hedging and trees separating the buildings, and a public footpath on the western side. As such, the proposals will not have an unacceptable impact on the residential amenities of both new and existing residents, all in accordance with Policy DM1.

6.16 With the retention of the existing boundary trees and hedges the replacement dwelling will not have a detrimental impact in terms of overbearing, effects of visual dominance, or loss of light to neighbouring properties, all in accordance with Policy DM1.

Highways and Parking

6.17 With an integral double garage and ample on site parking, the proposal exceeds the minimum parking requirements of 3 parking spaces as required by Eastleigh Residential Parking Standards SPD.

Ecology

6.18 The ecological appraisal confirms that the proposals will not result in a loss of habitat and that there is no evidence of roosting bats within the existing dwelling, and negligible bat roosting potential. As such, these proposals accord with Policy DM11.

7 CONCLUSION

CONCLUSION

- 7.1 The proposed replacement dwelling results in a high quality dwelling that updates the externals and enhances the character of the area, with no detrimental impacts on the openness of the area.
- 7.2 The increase in volume of the proposed dwelling materially meets the policy requirements within the Old Bursledon Special Policy Area.
- 7.3 The proposal accords with all policies of the Local Plan, and SPD requirements and it is therefore respectfully requested that the LPA supports this application.

8 APPENDIX 1 - POLICIES

Strategic policy S1, Delivering sustainable development

1. *“To be sustainable, new development in the Borough should:*
 - a. *meet community needs without compromising the identity of the Borough or its individual settlements, or the ability of future generations to meet their own needs;*
 - b. *enhance social equality by ensuring equal and easy access to a range of community facilities and services and by promoting the development of employment, education and skills training opportunities;*
 - c. *maintain and help to grow a high-performing local economy that benefits the Borough, south Hampshire and the wider economy, without adverse impact on south Hampshire’s city, town and other centres, the quality of the local environment or local transport networks;*
 - d. *have regard to the potential impacts of climate change, and the need to limit greenhouse gas emissions including through carbon sequestration and by promoting measures to design buildings and spaces which are adaptable to predicted climate change, and restrict development in areas at risk from flooding, minimise energy use and encourage the generation of renewable energy, and by minimising emissions from motorised transport, industrial activity and domestic uses;*
 - e. *minimise the need to travel longer distances and, where travel is necessary, prioritise more sustainable forms of transport, such as active travel, other alternatives to car use, or a combination of active travel and other alternatives to car use;*
 - f. *avoid impacts on the Hamble and Itchen catchments and associated flora and fauna species by preserving water quality and flows from development and safeguarding potential yield of local water resources used for public water supplies having regard to the impacts of abstraction;*
 - g. *seek opportunities to optimise density of new development and redevelopments;*
 - h. *use resources wisely and minimise the generation of waste in the construction, occupation and use of buildings;*
 - i. *maintain local environmental quality, including avoiding damage to, and where possible enhancing, the existing valued urban and rural environments in the Borough and heritage assets;*
 - j. *have regard to the purposes¹² of the South Downs National Park, including regarding its status as an International Dark Night Skies reserve; and*
 - k. *maintain, enhance, extend and connect the natural habitats within and landscape value of the Borough, extending natural habitats into new and existing development to achieve an environmental net gain.*

2. *Applicants are encouraged to undertake pre-application consultation with the relevant statutory and non-statutory consultees.*
3. *When considering development proposals the Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the National Planning Policy Framework. It will always work proactively with applicants jointly to find solutions which mean that proposals can be approved wherever possible, and to secure development that improves the economic, social and environmental conditions in the area.*
4. *Planning applications that accord with the policies in the Local Plan will be approved without delay, unless material considerations indicate otherwise. Where there are no policies relevant to the application or relevant policies are out of date at the time of making the decision then the Council will grant permission unless material considerations indicate otherwise, taking into account whether:*
 - a. *any adverse impacts of granting permission would significantly and demonstrably outweigh the benefits, when assessed against the policies in the National Planning Policy Framework taken as a whole; or*
 - b. *where specific policies in that Framework or other international or national legislation indicate that development should be restricted”*

Strategic Policy S5, New development in the countryside

1. *“Planning permission will be granted for new development in the countryside provided it is related to:*
 - a. *the provision of employment through agricultural development (policy DM17), the extension and replacement of existing employment uses (policy DM18) and the re-use of existing buildings (policy DM19);*
 - b. *residential extensions and replacement buildings (policies DM18 and 26), limited residential conversions (policy DM19), rural workers’ dwellings (policy DM27) and accommodation for Gypsies, Travellers and Travelling Showpeople (policy DM31);*
 - c. *community, tourist, or visitor uses through the re-use of buildings including facilities for the interpretation of heritage assets (policies DM12);*
 - d. *outdoor recreation and open space (policies DM32 and DM33);*
 - e. *allotments and community farms (policy DM32);*
 - f. *cemeteries (policy DM37); and*
 - g. *essential public utilities (policy DM9).*
2. *In permitting new development in the countryside the Borough Council will seek to:*
 - a. *avoid adverse impacts on the rural, woodland, riparian or coastal character, the intrinsic character of the landscape including the avoidance of adverse landscape impacts on areas adjoining national parks and their settings, the significance of heritage assets and on the biodiversity of the area;*

- b. *secure long-term beneficial management practices that will enhance the landscape and biodiversity of the countryside and coast;*
- c. *avoid sterilisation of mineral resources, in accordance with the Hampshire Minerals and Waste Plan;*
- d. *safeguard the best and most versatile agricultural land unless the benefit of the development clearly outweighs the loss; and*
- e. *protect soils during construction wherever possible in line with the 'Defra code of practice for the sustainable use of soils on construction sites'."*

Strategic policy S8, Historic Environment

1. *"The Borough Council will continue to conserve and/or enhance the Boroughs heritage assets in a manner appropriate to their significance. This includes all heritage assets including listed buildings and structures, Conservation Areas as designated on the policies map, landscapes and archaeology. This will be through the preparation of Conservation Area Appraisals and Management Plans and other strategies and in the determination of planning applications for new development (see policy DM12). This will involve:*
 - a. *identifying the assets by means of an on-going programme of survey and review;*
 - b. *identifying their key features and measures to manage and enhance these, e.g. through Conservation Area Appraisals;*
 - c. *restricting development likely to harm them or their settings through management of development proposals; and*
 - d. *encouraging development that enhances them, ensures their long-term management and maintenance and where possible, enables public enjoyment and the interpretation of the asset."*

Policy DM1, General criteria for new development

1. *"All new development should (as relevant):*
 - a. *not have an unacceptable impact on, and where possible should enhance:*
 - i. *residential amenities of both new and existing residents; the character and appearance of urban areas, the countryside and the coast;*
 - ii. *biodiversity (avoiding significant adverse impacts); and*
 - iii. *the significance of heritage assets;*
 - b. *make efficient use of the site, maximise opportunities to increase density and have regard to potential development opportunities on adjoining land;*
 - c. *take full and proper account of the context of the site including the character, appearance and land uses of the locality or neighbourhood, and be compatible with adjoining uses and be well integrated with these in terms of mass, scale, materials, layout, density, design and siting, both in itself and in relation to adjoining buildings, spaces and views. Where adjoining development is poor in*

- urban design terms, new development should contribute to improving the character of the area;*
- d. *not involve the loss of or damage to trees, woodlands, hedgerows, ponds, priority habitats or other landscape features of value to the character of the area, for appearance or biodiversity unless they can be replaced with features of equivalent or enhanced value, (recognising that some species and habitats may be irreplaceable);*
- e. *include a landscape scheme covering the design and layout of external space;*
- f. *protect and enhance public rights of way and National Trails and provide fully connected green infrastructure that interlaces the development and connects into the wider network;*
- g. *provide satisfactory management arrangements for all landscape, green infrastructure and biodiversity enhancement;*
- h. *incorporate provision for people with disabilities and create accessible communities that cater for all;*
- i. *incorporate design measures to inhibit criminal and anti-social behaviour;*
- j. *incorporate provision for on-site waste management; and*
- k. *include provision for public art associated with new large scale development in accordance with the Council's adopted Public Art Strategy."*

Policy DM2, Environmentally sustainable development

1. *"The Borough Council requires that:*
 - a. *all new build residential development (C3 Use Class only) must achieve at the time a Reserved Matters or Full Planning Application is submitted:*
 - i. *a 19% improvement in predicted carbon emissions, compared with the building regulations standard current at the time, through increased energy efficiency of the building fabric, unless this is superseded by an updated building regulations requirement equivalent to 'zero carbon homes'; and*
 - ii. *a predicted mains water consumption of no more than 110 litres/person/day.*
 - b. *all other development that is above 500 sq.m of floorspace measured externally (including extensions and conversions to existing buildings) must achieve BREEAM 'excellent' (or equivalent) or BREEAM 'very good' plus 'passivhaus' certification including a 15% improvement in predicted carbon emissions, compared with the building regulations current at the time, through low or zero carbon energy generation on site or in a Borough location agreed by the Council.*
 - c. *all other larger developments above 10,000 sq.m of floorspace should also seek to fund post occupancy evaluation (POE) in addition to the above.*
2. *In addition to the above, all development above 500 sq.m of floorspace measured externally (including extensions and conversions to existing buildings) and external*

APPENDIX 1 - POLICIES

spaces within the curtilage serving developments of this size should where practical and viable:

- a. incorporate energy-efficient passive design principles, the best use of natural daylight and natural ventilation systems wherever possible;*
- b. connect to any existing near or adjacent low carbon local energy network unless this is proved unviable;*
- c. use recycled, low embodied carbon, low environmental impact and locally sourced materials in construction where possible;*
- d. be designed with sufficient flexibility to enable the life of the building to be extended by re-use for other purposes where feasible;*
- e. aim to deliver at least 1% of all residential units within the whole scheme which achieve full 'passivhaus' certification."*

Policy DM11, Nature conservation

"General Approach

1. The Council will work with statutory and voluntary agencies and developers, and will determine planning applications, to:
 - a. protect, conserve and enhance all:
 - i. international, national and local nature conservation designations; and
 - ii. networks of natural habitats and features, including the Local Ecological Network, Priority Biodiversity Areas and Priority Biodiversity Links, watercourses, wetland complexes, woodland trees, and trees and hedgerows important to biodiversity and local character;and facilitate their adaptation to climate change wherever possible;
- b. assist in achieving national, county and local biodiversity targets as set out in Biodiversity Action Plans (BAPs);
- c. seek a net gain of biodiversity on all development sites (including sites for redevelopment) through the protection, enhancement and connection of existing and provision of new habitats and features of nature conservation interest compatible with the native biodiversity characteristics of the Borough, having regard to local geodiversity and soils; and
- d. contribute to major elements of the PfSH Green Infrastructure Strategy and other strategies for the provision and enhancement of multifunctional green infrastructure including green routes, ecological networks and biodiversity enhancements (see strategic policy S9).

International Designations

2. Development which is likely (either individually or in combination with other developments) to adversely affect the integrity of an international or European nature

conservation site will not be permitted subject only to imperative reasons of overriding public interest and securing any necessary compensatory measures in the absence of alternative solutions. A 'project level' Habitat Regulations Assessment will be required where there are likely significant effects or uncertainty. Any mitigation measures required to ensure no adverse impact must be implemented at the appropriate time.

3. The Council will work with PfSH, Natural England, the Environment Agency and other wildlife organisations to develop and implement with developers a strategic approach to the protection and enhancement of international and European sites from the direct and indirect effects of development. Within Eastleigh Borough this will include:
 - a. implementing:
 - i. the Solent Recreation Mitigation Strategy (requiring contributions from residential developments within 5.6 kilometres of the Solent Special Protection Area to the Strategy); and
 - ii. the interim and any future New Forest Recreation Mitigation Strategy if required;

or alternative agreed site specific measures to address recreational disturbance;

- b. preserving the water quality and flows within the Itchen and Hamble, Southampton Water and Solent;
- c. protecting the River Itchen SAC, in particular the maintenance and where appropriate restoration of habitats and qualifying species to favourable conservation status (as defined by article 1 of the Habitats Directive); and
- d. seek contributions towards measures set out in the Southern Damsely Conservation Strategy (or other strategy) specifically to deliver biodiversity net gain.

National and Local Designations

4. Development will not be permitted if it is likely (either individually or in combination with other developments) to have a direct or indirect adverse effect on a Site of Special Scientific Interest (SSSI), Site of Importance for Nature Conservation (SINC) or Local Nature Reserve (LNR) as shown on the policies map (or on a more recent plan provided by the Hampshire Biodiversity Information Centre) unless it can be demonstrated that:
 - a. there are no alternative solutions;
 - b. the adverse effects are unavoidable;
 - c. measures are taken to mitigate or, as a last resort, compensate for the adverse effects;
 - d. there is an overall biodiversity net gain; and
 - e. if there are any residual adverse effects which cannot be avoided, mitigated or compensated, the benefits of the development must clearly outweigh the adverse

effects on the nature conservation value of the site and any broader impacts on national and local designations.

Priority habitats, protected and priority species and the local ecological network

5. *Development will not be permitted if it is likely (either individually or in combination with other developments) to have a direct or indirect adverse effect on priority habitats, protected or priority species, or on the local ecological network unless it can be demonstrated that:*
 - a. *there are no alternative solutions;*
 - b. *the adverse effects are unavoidable;*
 - c. *measures are taken to mitigate or, as a last resort, compensate for the adverse effects;*
 - d. *there is an overall biodiversity net gain; and*
 - e. *if there are any residual adverse effects, the benefits of the development clearly outweigh the adverse effects on priority habitats, priority and protected species, and the local ecological network.*

Irreplaceable habitats

6. *Development will not be permitted if it results in the loss or deterioration of irreplaceable habitats (such as ancient woodland and ancient or veteran trees), unless there are wholly exceptional reasons and a suitable compensation strategy exists.*

Buffers

7. *Buffers free from development will be provided to designated sites to avoid/mitigate impacts, including recreational impact and impacts on edge habitats, and to maintain dark skies.*

Surveys

8. *Development will not be permitted unless it can be demonstrated that:*
 - a. *there have been thorough habitat and species surveys;*
 - b. *the great crested newt strategic survey and strategy have been considered in all developments within 500m of a great crested newt pond; and*
 - c. *the strategic bat trapping survey has been considered in all developments within the locality of a woodland or connected habitat networks."*

Policy DM14, Parking

1. *"New residential development will be required to provide off-highway parking which is adequate in terms of highway safety/traffic management. Provision will take account of the adopted Eastleigh Borough Council's Residential Parking Standards SPD which sets out minimum requirements for parking provision. Over provision relative to car ownership levels or which would create an ineffective use of space will be avoided. Applications with parking levels which deviate away from the expected*

standard should be substantiated by robust evidence contained within the transport statement/assessment/travel plan.

2. *For out-of-centre development proposals, parking needs will be assessed based on the impacts of the development on neighbouring town, district or local centre or a neighbourhood parade.*
3. *Within town, district and local centres and in neighbourhood parades, parking needs will be assessed in relation to wider needs within the centre/parade. Where existing provision is inadequate, the provision of additional parking may be permitted subject to a financial contribution towards measures to assist on-street parking management, public transport, cycling and walking.*
4. *Proposals to provide new car parks, extend existing car parks or provide workplace park and ride facilities will be permitted if:*
 - a. *it can be demonstrated that this is the only way the transport requirements driving the proposals for car parking provision can be met;*
 - b. *the proposals form part of a strategy aimed at managing use of the private car, such as a workplace travel plan; and*
 - c. *transport and other environmental assessments demonstrate that the benefits of the proposal (e.g. reduction of on-street parking pressures, reduction of traffic congestion) outweigh any adverse effects; and*
 - d. *the design, layout, planting and landscaping and lighting provision addresses visual and landscape impacts, noise, lighting and impacts on residential amenity; and*
 - e. *the developer pays for any off-site highway improvements necessary from traffic generated by the proposal, and any additional works necessitated by an inability to meet workplace travel plan targets; and*
 - f. *for sites outside the urban edge and in accordance with other policies in the Plan, they are subject to a sequential approach prioritising sites within the urban edge. Proposals in settlement gaps will only be acceptable in exceptional cases (see strategic policy S6)."*

Policy DM26, Residential extensions and replacement dwellings in the countryside

1. *"The extension or replacement of a permanent dwelling in the countryside will be permitted subject to the general development criteria and transport policies of the Local Plan and provided:*
 - a. *the extension or replacement dwelling will not be disproportionate in size to the existing dwelling, neighbouring properties or in relation to its plot, or involve any extension to its curtilage; and*
 - b. *in the case of a replacement dwelling, the proposal includes the replacement of the dwelling within the curtilage, and on the same footprint as the existing*

- building, unless environmental and/or access benefits arise from an alternative location within the curtilage; and*
- c. no additional dwellings are created.*
- 2. *Permission will not be given for the replacement of mobile homes with permanent dwellings.*
- 3. *Residential institutions will be treated for the purposes of this policy in the same way as dwellings.*
- 4. *Proposals to extend or to replace rural workers dwellings will be considered under Policy DM27."*

Policy BU7, Residential extensions and replacement dwellings, Old Bursledon Special Policy Area

- 1. *"Residential extensions and replacement dwellings in the Old Bursledon Special Policy Area as defined on the policies map will be permitted provided they:*
 - a. do not increase the volume of the original dwelling (as existing when the conservation area was first designated in 1982) by more than 25%. Further extension beyond this limit will not be permitted;*
 - b. have regard to the impact of the development on the space between buildings and the openness of the area, ensuring that the character of the undeveloped landscape between buildings is conserved and enhanced;*
 - c. do not create a dwelling disproportionately larger than the one that is being extended or replaced;*
 - d. are subservient to and in proportion to the existing building in form, scale and design;*
 - e. do not contribute to the cumulative urbanisation of the area; and*
 - f. are not otherwise detrimental to the character of the area as viewed from the River Hamble."*
