The map shows a grid of points labeled A11 through A25. A compass rose indicates North (N). The study site (A13) is highlighted with a green square and a purple circle. The grid is bounded by A21 to A25 horizontally and A11 to A20 vertically.

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840 s. In 1854 the 1:2,500 scale was adopted for mapping urban areas, these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single area in the late 1940's. The 1:10,560 maps were produced from updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overlaid with the National Grid. In 1970 the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Historical Aerial Photography

Published 1947 - 1949

Source map scale - 1:10,560

The Historical Aerial Photos were produced by the Ordnance Survey at a scale of 1:1,250 and 1:10,560 from Air Force photography. They were produced between 1944 and 1951 as an interim measure, pending preparation of conventional mapping, due to post war resource shortages. New security measures in the 1960s meant that every photograph was taken on a security basis. The information was not to be used for any other purpose. The photos were taken from a high altitude and the quality of the images is not as good as modern aerial photography. The photos are available after a period of five years although due to the security basis of the original photos, without viewing both revisions it is not easy to spot the edits. Where available, Landmark have included both revisions.
