Two storey rear extension discharge of condition 4 and condition 5 of H/22/94300

Alex Stone

23/11/23

I have reviewed the submitted bat mitigation class license application. Two bat tiles/bricks/tubes are proposed, with underlapped felt with cut sections to allow greater bat access under the tiles. Although a Phase 2 bat survey report has not been submitted with this discharge of conditions application, the mitigation method is thoroughly described in section 5.6.2 of the Bat Preliminary Roost Assessment by Hampshire Ecological Services (February 2023) submitted for the original application H/22/94300 and I am satisfied that both conditions 4 and 5 can now be discharged.
