

Ecology response for F/23/96317 BERRYWOOD BUSINESS VILLAGE, TOLLBAR WAY, HEDGE END

Relocation of front entrance with associated ramp and stairs for access. Installation of plant to the rear.

Rachael Morris

24/11/23

This site is within an amber great crested newt impact risk zone. There are records of grass snakes, bats, stag beetles, and hedgehogs near this site.

Site photos are required to determine whether any habitat for these protected species would be affected by these proposals.

Biodiversity enhancements will be required. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk › our-work › putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
