

Ecology response for H/23/96567 111 HURSLEY ROAD, CHANDLER'S FORD, EASTLEIGH,
SO53 1JD

First floor rear and single storey rear/side extensions with raised rear patio

Claire Campbell-Best

28/12/23

This property is in a green impact risk zone for great crested newts. There are records of bats very close to the site and hedgehogs, swifts and stag beetles in the neighbourhood. I need to review photos of any areas which would be impacted by these proposals to determine whether a survey will be required. This would include any flashings, fascias, roof tiles, rear and side elevations and the rear garden.

Biodiversity enhancements will be required. A bat box and a swift box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
