Description of Proposed Works

Please describe the proposed works

Replacement of Existing Outbuildings

The proposal seeks to replace the existing collection of outbuildings, including the current oak-framed coach house, with a single cohesive oak-framed structure that is both more attractive and more functional.

The existing coach house is positioned facing the boundary fence rather than the driveway, which severely restricts practical vehicular access. As a result, the building is no longer fit for purpose for garaging and has become visually tired and functionally obsolete. The associated sheds are of mixed appearance and limited architectural merit, contributing little to the character of the site.

The proposed development will consolidate these structures into one well-designed, traditionally detailed oak-framed building. The revised orientation will allow the coach house to face the driveway, enabling safe and practical vehicle access while reinforcing the traditional arrangement. The large conifers that have been planted to hide the structure are not in keeping with surrounding oak trees and Hampshire local woodlands would need removal

This replacement approach:

- Improves the overall visual quality of the site
- Enhances functionality
- Reduces the fragmented appearance of multiple outbuildings
- Maintains development within the established storage area

The proposal therefore represents a qualitative improvement to both the appearance and usability of the site, while remaining sympathetic to the rural character of Dodwell Cottage and its setting within Bursledon.
