Dear Liz,

The January report is acceptable. The only concern with the February report is in Figure 3 – it appears to show a new headwall in the ditch and the fencing has been removed to install it. Can we ask whether the fencing has been reinstated in this area (with photographic evidence).

Thanks,

Chris.

Hi Liz,

On balance, I feel that the December report demonstrates that the trees continue to be protected.

Hi Liz,

On balance, I feel that the updated August report and the September report demonstrate that the trees continue to be protected as per the original decision.

Hi Liz,

I have reviewed the August report. It does not contain any photographs for the western section of the development. Is there a reason for this? Is it possible to get some, please? (They can be sent via email attachments – there is no need to amend the report.)

Chris.

Hi Liz,

I have reviewed the reports for April, June and July. The report for April appears to show some images from the May report and some from the March report. We believe that this report was originally missing and now it *appears* that they have manufactured it! This is obviously disappointing. We would encourage honest dialogue if a missed-month occurs in the future.

Regardless of the April report, we are satisfied that the tree protection measures were present in June and July.

Chris.
