

Aviation Fuel Storage Systems

Quotation for:	10,000 / 15,000 Litre Bulk Jet A-1 Storage Tank with Premium Cabinet	Date:	February 10, 2026
Customer name:		Tel:	Email

Image shown for illustration purposes

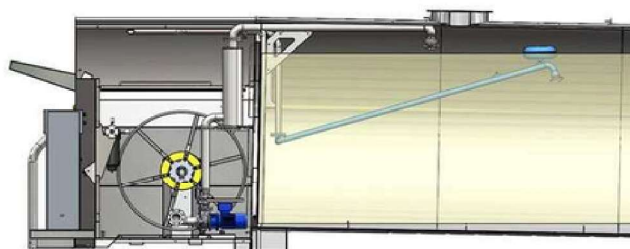

Specification includes:

- Horizontal double skinned integrally bundled construction.
- Heavy duty 304L grade stainless steel inner tank with manway access & inspection hatch.
- 4mm & 5mm thick S275 grade mild steel outer bund. 110% tank capacity.
- Double broad cradle base with 1:50 angled fall to sump low point.
- Open fronted design for easy access to fuel dispenser, with rain peak and galvanised pump stand.
- Premium extra cabinet with vented side entrance door giving access to filters, reel and offset fill line etc.
- Side cabinet with roller shutter door.
- Fill point – 3" stainless steel with Self Climat OPD Overfill Valve DN80 type NT- Jet A1 / Avgas.
(Please note: This valve will accept deliveries of up to 990Lpm, anything above this will require dual overfill valves**)
- Normond hydrostatic tank level contents gauge.
- 1" stainless steel sump draw line.
- Shot blasted to SA 2.5 and painted in 2-pack polyurethane finish (standard White).
- Pump cabinet lighting - ATEX Zone 1 - Ex II 2G, Ex de IIC T4 Gb, Fluorescent luminaire T4 (2 x 36W, DTS EVS240).

Dispensing & other equipment

Fuel sampling, inspection & recovery system, with pump and Facet VF-22SB return filter (included)

Floating suction arm:

Remote Isolation Pedestal:

- Galvanised pedestal to be mounted 5m to 8m away from tank.
- Lockable electric cupboard housing lockable Eaton 63A Rotary isolation switch.
- Designed for safe distance shut-down of the tank's electrical supply.

Appendix A

Dispensing equipment images:

Pumptronics Series C Commercial fuel dispensing unit

Facet VF-22SB vessel and CC-22-7 coalescer separator element

Fuel Proof hydraulic powered hose reel with 30m x 1" Elaflex HD25

ZVF25 manual refuelling nozzle with removable fine mesh strainer

30m hand rewind earth bonding reel

Fuel Proof fuel sampling, inspection and recovery system, with 4L Closed Circuit Sampler

Optional loading pump
(Generally a requirement for Avgas tanks, and also Jet A1 in some regions)

Sloping manway access lid and (optional) access steps
