

Electromagnetic and/or Ground Penetrating Radar techniques have been used to locate underground utilities and features on the drawing to BIS PAS128 Specification. PAS128 Survey Type D data has been consulted and utilised in this survey. Any OLD, QLC or Data provided (e.g. pipe sizes and position) is not guaranteed as historic record information is often incomplete and inaccurate. The information is provided as a guide only and should not be relied upon or taken as an order for any work. Any inaccuracies relating to topographical plans/development plans/Ordinance Survey data that we have not come over the liability of the customer. Where queried, depth information of underground services/features is stated. Depths are generally within +/- 10% accuracy, but cannot be guaranteed. Any depths shown in drains are usually to invert (base of drainage channel) unless otherwise stated. We have made every endeavour to make sure that the information contained within this drawing is accurate and of the highest quality, but we cannot accept any liability for any errors or omissions that may occur. We cannot be held responsible for any damage or loss of any kind that may be caused by the information or depth of services/features is of particular importance to a project then it is located or advised that discussions be held with KIGORP. Surveys Ltd regarding any possible limitations or anomalies. It is also strongly advised that all excavations should be undertaken to verify survey results.
