

Ecology response for H/26/101139 255 WINCHESTER ROAD, CHANDLER'S FORD, EASTLEIGH, SO53 2DX

Conversion of existing first-floor room above detached garage to annex, ancillary to the main dwelling

Alexandra Stone

20/4/26

There are records of bats and hedgehogs close to this site with nesting swifts in the wider area.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF (December 2024) paragraphs 187d and 192 b. A bat box and a swift nest box may be appropriate for this building.

The SW side elevation would be suitable for a bat box, the bat box should not be positioned directly above the window or the door, but as high as possible. The NE elevation would be suitable for a swift nest box, positioned as high as possible near the eaves. The garden should be enhanced with flowering plants for pollinators.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > our-work > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
