

Ecology response for H/26/101285 26 VICTENA ROAD, FAIR OAK, EASTLEIGH, SO50 7FX

Single storey rear and side extension to existing detached garage, to tie in with existing house, an increase in flat roof height and extension of canopy across front elevation of garage.

Charlie Vallis

4/5/26

The extension of the garage would be on hard standing, so no ecological impacts would be expected. I don't see any obvious potential bat roost features on the photos of the house or the garage that are visible on Google maps.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF (December 2024) paragraphs 187d and 192 b. A bat box and a swift nest box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
