Good afternoon Rebecca,

Please find attached all of the photos along with a brief description of the buildings and their sizes.

I have indicated the location of a singular vehicle access to the site. We access the country park at the same point as the general public, ie via the Victoria road access point. The staff accommodation is designed for 1 or two members of staff depending on who I have working for me at the time. I currently have a couple working for me, but previously I had a single man, the rest of my staff work predominantly during the day with only a requirement for staff to stay overnight for the safety of guests and the security of the site.

We continue to implement the same as was in place before we took the site. When it was just camping and caravanning for the last 40 years. The customers are able to park with their accommodation. Any additional parking is in the country park car parking spaces.

Hopefully this is ok for you. I'm available to chat at any time.

Thank you again for your help with all of this, I truly appreciate your time.

John
