It originates from the private land near number 5 and overhangs the garden/shed of the applicant at number 6. The tree appears healthy. It doesn't directly encroach onto the house at the moment, adequate vertical clearance over the shed. The reduction by 4m is deemed excessive, crown lift to 4m and 2m pruning of the 3 limbs indicated on the photo submitted with the application should be able to achieve the desired effect as not many branches are low.
