

Ecology response for H/26/101300 55 ATLANTIC PARK VIEW, WEST END, SOUTHAMPTON, SO18 3RR

Retention of single storey rear extension replacing existing conservatory and extension to front porch (Retrospective application)

Alexandra Stone

2/6/26

There are records of bats, nesting swifts and badgers in this area. I have reviewed photos of the site on Google maps and don't see any habitat for protected species that would have been affected by this work.

Biodiversity enhancements are required in accord with Local Plan policy DM 11 and NPPF (December 2024) paragraphs 187d and 192 b. A bat box and a swift nest box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
