

Ecology response for H/26/101453 14 ORAM WAY, WEST END, SOUTHAMPTON, SO30 3JW

Single storey rear extension

Alexandra Stone

3/6/26

There are records of near this site with bats and hedgehogs in the wider area. It is in an amber impact risk zone for great crested newts.

This is a brick house in a fairly new development and does not appear to have any features that would provide habitat for any of these species at the rear of the building. From the aerial photos available on Google maps, the rear garden has an area of hard standing next to the house and the rest appears to be artificial turf.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF (December 2024) paragraphs 187d and 192 b. A bat box and a swift nest box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > our-work > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight. (<https://www.swiftconservation.org/Nestboxes%26Attraction.htm>)
