

Ecology response for H/26/101455 92 LE MARECHAL AVENUE, BURSLEDON,
SOUTHAMPTON, SO31 8LX

Loft conversion with addition of 2no. front dormer windows

Alexandra Stone

3/6/26

I have reviewed the photo of the building on Google maps and can see that it is a new building in a new development.

This site is in a red impact risk zone for great crested newts. There are records of bats, nesting swifts and hedgehogs in the wider area. I don't see any potential habitat on site for these species that would be affected by this proposal.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF (December 2024) paragraphs 187d and 192 b. A bat box and a swift nest box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
