

Ecology response for H/26/101423 36 BRUNSWICK ROAD, FAIR OAK, EASTLEIGH, SO50 8FE

Single storey side extension following part removal of existing conservatory.

Gina Aftanas

9/6/26

There are records of bats nearby and hedgehogs in the wider area. I have reviewed the photos of the site available on Google maps and do not see any potential habitat for bats that would be affected by this proposal.

Precautionary working methods for hedgehogs will be required. This should include:

- All building materials to be stored on hard standing or on pallets, as far as possible from hedgerows, scrub or potential habitat.
- Any excavations must be covered at night or be fitted with a small animal escape ramp
- No fires can be lit on site.
- Waste must be stored in a skip and not be allowed to accumulate in piles which could be used by wildlife. Any chemicals and fuels must be stored carefully and away from potential wildlife habitat.
- Any animals found on site should not be handled but be allowed to move away to a place of safety on their own.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF (December 2024) paragraphs 187d and 192 b. A bat box and a swift nest box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight. (<https://www.swiftconservation.org/Nestboxes%26Attraction.htm>)
