

Ecology response for H/26/101612 5 THE DROVE, WEST END, SOUTHAMPTON, SO30 2EF

Proposed porch following demolition of existing porch

Alexandra Stone

6/7/26

This site is in an amber impact risk zone for great crested newts. There are nearby records of reptiles and bats, and records of badgers in the wider area.

I have reviewed the photos of the front elevation available on Google maps and do not see any potential habitat for protected species that would be affected by this proposal.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF (December 2024) paragraphs 187d and 192 b. A bat box and a swift nest box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
