

Ecology response 21 7 26 for F/26/101562 FIELD HOUSE, GREENFIELD CLOSE, HEDGE END, SOUTHAMPTON, SO30 4DN

Proposed change of use from residential institution (C2) to residential dwelling (use class C3)

Rachael Morris

21/7/26

There are records of bats, reptiles and badgers near this site. No proposed external works have been proposed.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF (December 2024) paragraphs 187d and 192 b. A bat box and a swift nest box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > our-work > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
