

H/26/101265 – GLEN LEA, CHURCH HILL, WEST END

28/07/2026

Dear Charlie,

At this stage we would raise an arboricultural objection. The application does not suitably demonstrate that no trees were impacted during construction. The applicant has not supplied any useable tree information in compliance with British Standard 5837, so we are unable to assess the proposals. However, it appears that the gabion wall is well within Root Protection Areas (RPAs) of multiple trees within the wooded area to the northwest.
