

Ecology response for H/26/101377 18 TADBURN CLOSE, CHANDLER'S FORD, EASTLEIGH, SO53 2NF

Erection of front porch, replacement front steps with landing area, UPVC window on the ground floor above garage roof and cladding boards to front upper level of front of property (part retrospective).

Gina Aftanas

28/7/26

There are records of bats in the area.

There are hanging tiles on the front of the property, however I don't see any obvious gaps or slipped tiles in the photos provided.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be informed. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF (December 2024) paragraphs 187d and 192 b. A bat box and a swift nest box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight. (<https://www.swiftconservation.org/Nestboxes%26Attraction.htm>)
