

Ecology response for L/26/101825 29 HIGH STREET, BOTLEY, SOUTHAMPTON, SO30 2EA

Proposed replacement sashes of 19no. sash windows & proposed replacement of 3no. casement windows.

Gina Aftanas

4/8/26

There are records of bats near this site. Bats could roost in gaps around windows, so photos of each window and the areas around it are required for review. The photos must be numbered to match the numbers on the annotated ground floor and first floor plans to identify the locations in case further investigation is needed.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF (December 2024) paragraphs 187d and 192 b. A bat box and a swift nest box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
