

Ecology response for H/26/101800 12 MALCOLM ROAD, CHANDLER'S FORD, EASTLEIGH, SO53 5BG

Side extension to dwelling including rear dormers and erection of detached double garage to front garden.

Charlie Vallis

4/8/26

There are records of bats, hedgehogs and water shrews near this site and records of slow worms in the wider area.

To determine whether any surveys will be required I need to review close up photos taken in good light of all areas of the house including the roof, fascia, soffits (standing next to building and looking upwards), flashings, hanging tiles, the elevations to be affected by the proposal and any potential gaps or openings.

Photos of any areas of the garden affected by the proposal are also required.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF (December 2024) paragraphs 187d and 192 b. A bat box and a swift nest box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > our-work > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
