Tree Officer:	No Objection		

Site Visit:	Yes ☒	No ☐
Details: Site visit carried out 16/07/2026 – photographs on file.		

Legislation:
Section 38(6) of the Planning and Compulsory Purchase Act 2004 states: <i>"If regard is to be had to the development plan for the purpose of any determination to be made under the planning Acts the determination must be made in accordance with the plan unless material considerations indicate otherwise."</i>

Policy:
National Planning Policy Framework Planning Practice Guidance Development Plan: The <u>Eastleigh Borough Local Plan 2016-2036</u> The most relevant policies are Strategic policies S1 and S2; and Development Management policies DM1, DM11 and DM14. Supplementary Planning Documents: Quality Places (June 2026); Parking Standards (September 2025); Character Area Appraisals.

Proposal:
This application seeks approval for a first-floor front extension. The extension measures approximately 4.2m in width, 1.8m in depth from the principal elevation and 3.8m to the ridge in height utilising pastel green cedar fibre cement cladding with matching windows and rooftiles.

Assessment:

Principle

The development is located within the urban edge, where the principle of development is considered acceptable, subject to the detailed matters according with the relevant planning policies.

Site and Surroundings

The application site comprises a two-storey semi-detached property located at the northern end of Maytree Road, south of Hocombe Road, in Chandlers Ford. The property is set back from the road by way of block paved driveway with hedgerow/planting boundary treatment between neighbouring properties. The surrounding area is residential in nature featuring similar style house-types.

Character and Appearance

Policy DM1 requires development to take full and proper account of the context of the site including the character and appearance of the locality and be well integrated with these (in terms of mass, scale, materials, layout, density, design and siting), both in itself and in relation to adjoining buildings, spaces and views.

The proposal is suited to the host dwelling in terms of its form and scale by use of subservient design and pitch style roof. A pitch roof is suited to both the host dwelling and surrounding area, with this style of roof being a common feature within Maytree Road. Although the material used does not match the host dwelling, the chosen colour and texture is considered to be complimentary to the existing brick, allowing the extension to be a sympathetic addition to the street scene. It is expected to show a clear addition to the property, without harming the public realm.

The development would not be an overdevelopment of the site, would retain sufficient amenity space and meet parking standards. As a result, the development respects the established character of the locality and complies with the requirements of Policy DM1.

Residential Amenity

Policy DM1 amongst other matters, stipulates that all new development should not have an unacceptable impact upon residential amenities of both new and existing residents.

The most likely affected neighbour is number 22 Maytree Road as the proposal is on this neighbouring side. The extension passed the 45-degree test and therefore is not expected to cause harm to this neighbour in terms of loss of light or overshadowing. There are no windows proposed to the side elevations, so no loss of privacy is also not expected.

Due to the separation distances and positioning of the extension, no other neighbours are expected to be negatively affected by this proposal.

As a result, the development accords with guidance set out in the 'Quality Places' SPD in that there will be no unacceptable impact on the amenity of the neighbouring properties in terms of loss of privacy, light or outlook.

Ecology

Due to records of bats in the area, the Councils Ecology Team were consulted as part of this application. After reviewing the site, no objection was found subject to the following informatives being included within the decision notice.

- In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be informed. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.
- Biodiversity enhancements will be required in accordance with Local Plan policy DM 11 and NPPF (December 2024) paragraphs 187d and 192 b. A bat box and a swift nest box may be appropriate for this building.
The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)
Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight. (<https://www.swiftconservation.org/Nestboxes%26Attraction.htm>)

Other Material Considerations

- There will be no adverse impact upon trees or other natural features worthy of retention.
- There are no likely significant impacts on the SPA.

Climate Change:

In July 2019, the Council declared a Climate Change and Environmental Emergency. In doing so it agreed, among other things, to: (a) put in place measures to ensure the Council's own operations and functions achieve carbon neutrality by 2030; (b) work with partners to aim for all projects and services delivered in the Borough to achieve carbon neutrality by 2030; (c) ensure that the Council's procurement policy recognises carbon neutrality as one of its primary considerations; and (d) recognise the urgency of action to mitigate and adapt to climate change in every decision taken by the Council. This is underpinned by the Climate and Environment Emergency Strategy 2020–2030 and the supporting Climate and Environmental Emergency Action Plan – Update June 2020.

The declaration of the Climate Change and Environmental Emergency demonstrates a strong commitment from the Council to achieve net zero. The NPPF, development plan and adopted local plan policy do not set this as a specific target, but it is a material consideration to be considered alongside all other material considerations. In any case addressing climate change is a core part of the NPPF and local plan policy. The need to support the economy is part of the Strategic Environmental Assessment for the adopted local plan, as is an assessment of climate impacts.

The NPPF aims for the need for housing to be met, and policy S2 of the Local Plan sets a target for 14,580 dwellings to be provided by 2036. The NPPF, Policies S1, DM2 and DM3 of the Local Plan and energy and water elements of the adopted Environmentally Sustainable Development SPD require development to be sustainable in terms of resource use, climate change and energy use. When considering the impact of climate change, the proposed development is expected to be resilient to the potential effects of climate change and is expected to reduce/limit impacts on climate emissions as a result of the development or its use.

Equalities Implications:

Section 149 of the Equalities Act 2010 created the public sector equality duty. Section 149 states:

- A public authority must, in the exercise of its functions, have due regard to the need to:
 - a. eliminate discrimination, harassment, victimisation and any other conduct that is prohibited by or under this Act;

- b. advance equality of opportunity between persons who share a relevant protected characteristic and persons who do not share it;
- c. foster good relations between persons who share a relevant protected characteristic and persons who do not share it.

When making policy decisions, the Council must take account of the equality duty and in particular any potential impact on protected groups. It is considered that this application does not raise any equality implications

Conclusion: This application is recommended for approval.
