

Ecology response for H/26/101797 20 SELHURST WAY, FAIR OAK, EASTLEIGH, SO50 7JX

Demolition of the existing conservatory and erection of a single storey rear extension

Alexandra Stone

12/8/26

This site is in an amber impact risk zone for great crested newts and there are records of bats nearby, however the photo of the house that is available on Google maps does not show any potential habitat for great crested newts or bats on this site.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF (December 2024) paragraphs 187d and 192 b. A bat box and a swift nest box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
