

Ecology response for H/26/101826 145 LEIGH ROAD, EASTLEIGH, SO50 9DW

Formation of vehicular access including dropped kerb and associated hard standing

Rachael Morris

19/8/26

No objection.

This site is in an amber impact risk zone for great crested newts. There are records of hedgehogs nearby and vegetation along the site boundary which could provide shelter for hedgehogs. Great crested newts are not likely to be in this area due to a lack of habitat connecting to suitable ponds. Any vegetation clearance must be done when hedgehogs are likely to be active and not hibernating, between April and October.

A precautionary working method must be used to prevent harm to wildlife that could be using this site. It should include:

All building materials to be stored on hard standing or on pallets, as far as possible from hedgerows, scrub or potential habitat.

Any excavations must be covered at night or be fitted with a small animal escape ramp

No fires can be lit on site.

Waste must be stored in a skip and not be allowed to accumulate in piles which could be used by wildlife. Any chemicals and fuels must be stored carefully and away from potential wildlife habitat.

Any animals found on site should not be handled but be allowed to move away to a place of safety on their own.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11.

Information on biodiversity enhancements is available at:
