

Ecology response for H/26/101916 48 LONGMEAD AVENUE, BISHOPSTOKE, EASTLEIGH, SO50 6EL

Conversion of Integral Garage to Extend Existing Kitchen.

Gina Aftanas

8/9/26

No objection.

There are no ecological concerns with this application. The area around the garage is existing hard standing and I don't see any potential bat roost features that would be affected by this proposal in the photo of the building available on Google maps.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11.

A bat box and a swift nest box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
