

Eastleigh Borough Council Tree Preservation Order and Conservation Area Assessment Form

Application Number	T/26/101775					
Surveyor	DH					
Address	Rear of 6 Woodside Way, Hedge End. SO30 4BH					
Proposed work	1 no. Oak (T219) – Crown reduce by up to 3m, maintaining a natural-shaped crown. The tree is a tall, slender woodland edge oak with a natural growth bias towards the properties. It is showing early signs of decline, including dieback and reduced vigour at the branch extremities. Reduction will remove dysfunctional growth, reduce end weight on the limbs, and lessen the risk of branch failure while retaining the tree's natural form. The tree will continue to be monitored, with the aim of encouraging internal regrowth that may facilitate future phased reductions and prolong its safe retention.					
Assessment Date	Tuesday 8 th September.					
Officer comments	Mature English oak tree that stands in the woodland on the southwestern rear garden boundary. The canopy of the tree can be viewed from the public highway. The tree appears to be an attenuated specimen and is displaying reduced vitality. The proposed pruning works appear to be acceptable in this case.
