Details

Site Visit Reason	Initial Site Visit
Will the works potentially affect Exolum?	No
Further Information / Restrictions / Requirments	Pipeline depth is 900mm, marker peg left on Pipeline in corner of garden to identify the pipeline. This will remain in place until the refurbishment of the property is complete. In the photos behind my blue locator on the otherside of the fence is a exolum marker post and is visible through the slats of the fence. The Exolum pipeline only touches the corner of the garden and the extension to the property doesn't affect it.
